

#### COUNTER TERROR PRINCIPLES:

1. Terrorism must be stopped. It is generally successful at present. The terrorist seeks to gain his point, to achieve notoriety and usually to remain alive. These objectives must be denied.
2. These demands must never be granted, his demands under any circumstances, at any price, though we may frequently pretend to acquiesce.
3. No terrorist ever leaves the scene of his crime, unless dead or in custody.
4. No terrorist is ever identified or publicised, neither personality nor by group or cause.
5. The live terrorist must be quickly punished by the courts, by due process of the act and in accordance with the law.
6. Maximum speed in responding to terrorist acts. They must be terminated before they can be advertised.

#### TACTICAL OBJECTIVES:

1. Make sure that a terrorist action is really in operation.
2. Act quickly
3. Prevent escape (live prisoners are not necessary)
4. Agree to anything (what colour bus/what line aircraft)
5. Open an apparent exit (avoid cornered rat syndrome)
6. Use whatever weapons are suitable (blast grenades/ gas/bio-chemicals offer much promise). Shot guns - long range rifle.
7. Protect the innocent - if possible
8. Terrorism - like the plague, must be eliminated, thrown away into the rubbish bin like cholera, inquisition, piracy and the black death.
